⇒ APPROVAL REQUEST

→ Activity 1: Creation of Related List

The screenshot shows the ServiceNow user interface. On the left, a sidebar menu is open with 'Relationships' selected. The main area displays a promotional banner for 'Build Agent' with the text 'where with Build Agent' and 'Power your workflow applications'. The banner includes a graphic of a computer screen with a green checkmark and a circular progress indicator.

The screenshot shows the 'Relationship - Approval Request' configuration page in ServiceNow. The page has a header with 'Relationship - Approval Request' and a search bar. Below the header, there are fields for 'Name' (set to 'Approval Request'), 'Application' (set to 'Global'), 'Applies to table' (set to 'Network Database [u_network_database]'), and 'Queries from table' (set to 'Approval [sysapproval_approver]'). A blue banner below these fields states: 'This script refines the query in current that will populate the related list. For more information about it, its parameters and control variables, see the documentation. See also the article about the recommended form of the script.' Below the banner, there is a code editor with the following script:

```

1 (function refineQuery(current, parent) {
2
3     // Add your code here, such as current.addQuery(field, value);
4     current.addQuery('source_table', parent.getTableName());
5     current.addQuery('approval_for', parent.sys_id);
6 })(current, parent);

```

At the bottom of the page, there are buttons for 'Run Query Diagnostics', 'Update', and 'Delete'.
